SUMMARY

Computer Science student seeking a COOP internship in software development. Proficient in C++, Java, Python, Linux, and MySQL. Demonstrated interest in systems programming, low-level programming, and IoT. Built projects including a high-performance CLI log analyzer in C++ and a vehicle OBD-II data logger using ESP32 and TCP/IP. Growing interest in SCADA and industrial data acquisition systems. Familiar with OOP, Git/GitHub, and development tools including VS Code and Vim.

EDUCATION

Bachelor's degree in Computer Science

2022 – Present

Imam Abdulrahman bin Faisal University

CERTIFICATES

- Networking Basics [🔗](#)
- MATLAB Onramp

SKILLS

Tools & Technologies: Git, GitHub | C++, Java, python | Linux (terminal usage) | ESP32 | TCP/IP | MySQL

Concepts: Network | IoT | OOP | OS | Basic data structures | GUI development

Soft skills: Problem solving | Self-learning | Attention to detail

PROJECTS

CLI_Log_Analyzer [🔗](#)

02/2026

- Built a CLI tool in C++ to parse and filter Linux log files by level and timestamp
- Implemented argument parsing, file I/O, and error handling from scratch
- Tested against real logs with 1,000,000+ lines, achieving sub-600ms performance
- Managed source control with Git and documented the tool on GitHub

ESP32 OBD-II IoT Data Logger [🔗](#)

05/2026

- Built an IoT vehicle telemetry system in C++ on ESP32
- Polled real-time OBD-II data (RPM, speed, throttle, coolant temp) over WiFi via ELM327
- Logged structured CSV data to SD card with session-based auto-incrementing files
- Implemented TCP client, AT command initialization, and NO DATA fault handling

LANGUAGES

Arabic: Native, **English:** Proficient
